

GutBiome6

Change your gut, change your life

Supports gut immune function and gut flora

Promotes healthy gut barrier and lining

Helps balance your gut microbiome

Calms gut discomfort and helps with bloating

Enhances mood and overall brain health

Did you know your digestive system has its own “second brain”? This network, called the enteric nervous system (ENS), contains more than 100 million nerve cells that line your gut and constantly communicate with your central nervous system (CNS). When the gut falls out of balance, it can influence mood, immunity, and even behavior. That’s where GB6 helps - supporting a healthy gut-brain connection to keep your body and mind in sync.

GutBiome6

Change your gut, change your life

Your gut and brain are always talking - GutBiome6 helps them speak the same language. With Colostrum6 at its heart, this next-level formula supports a strong gut lining, balanced flora, immune strength, and a steady mood. Powered by marine algae fucoidan and a trio of pre-, pro-, and postbiotics, it's your daily gut reset-rooted in science and fueled by nature.

TRUST YOUR GUT. FEED IT RIGHT.

Your "Second" Brain

Science has discovered a second brain hidden in the walls of your digestive system. Your second "brain" links digestion, mood, immune health, and even behavior. Science calls this little brain the enteric nervous system (ENS). The "second brain" is two layers of more than 100 million nerve cells lining your gut, and it sends signals to your big brain or central nervous system (CNS). For people experiencing gut issues, this can trigger emotional & physical health shifts. Together, our "two brains" play a key role in overall health and well-being.

- **Gut microbiome diversity:** A balanced and diverse gut microbiome helps your "second brain" communicate clearly with your central nervous system, influencing everything from digestion to mood regulation
- **Healthy G.I. mucosal layers:** Strengthens the gut's protective barrier, helping prevent toxins and harmful bacteria from entering the bloodstream while promoting optimal nutrient absorption
- **Regulation of gut digestion:** Supports smoother digestion and nutrient breakdown, helping reduce bloating, discomfort, and irregularity for a calmer, more efficient gut
- **Supports compromised gut:** Provides targeted nutrients and beneficial bacteria to help restore balance and resilience in an overworked or sensitive digestive system
- **Proper immune system activity:** Because nearly 70% of your immune cells live in the gut, a healthy microbiome helps regulate immune responses and promotes whole-body defense
- **Positive overall mood:** Encourages healthy neurotransmitter production - including serotonin - for a more balanced emotional state and improved mental well-being
- **Supports healthy adrenals:** Helps your body adapt to stress by supporting adrenal function, which works closely with the gut-brain axis to maintain steady energy and mood

GutBiome6

Change your gut, change your life

Advanced Pre, Pro, & Post-Biotic Blend

A rare multi-biotic formula that promotes microbiome diversity and helps maintain gut barrier integrity

Gut Restorative Peptides

Proline-Rich Polypeptides (P.R.P.) support gut tissue, ease discomfort, and help reduce bloating

Lab-Certified 6-Hour Colostrum

Nutrient-rich bovine colostrum packed with immunoglobulins, antibodies, and peptides that nourish and protect the gut lining

Marine Algae Superfood

85% pure fucoidan from Okinawa's Blue Zone waters supports healthy mucosal layers and boosts beneficial lactobacillus levels

GB6 Multi-Biotics: What's the Difference?

Prebiotics: The Soil

Tilling the soil for growth. Prebiotics - fibers from leafy greens - prepare your gut for beneficial bacteria.

Probiotics: The Seed

Planting the seeds of balance. Probiotics are live bacteria that ferment fibers and prebiotics to create metabolites.

Postbiotics: The Harvest

Reaping the rewards. Postbiotics are the beneficial compounds produced after fermentation.

Immune & Gut Support

GB6 delivers a complete multi-biotic blend - fibers, bacteria, and metabolites - to support gut, immune, and mental health every day.

Metabolites:

These are the harvested nutrients - amino acids, vitamins, and short-chain fatty acids - that fuel your health.
